

MRGS Grade 4 Agricultural Science – Term 1 Project (2019)

Dear Parents,

In keeping with this term's theme of Information Communication Technology (ICT), we would like the students to create a poster which advises local farmers on how they can produce more food, and briefly explain how it contributes to food security.

Students are required to do a little research on new technologies that local farmers can use to produce more crops. We strongly encourage students to use Google or any relevant website for '**New Technology in Agriculture**' for ideas.

Instructions

- Use 8 ½ x 11 construction paper – label 'Agricultural Science' at the top of the page.
- Students must stick at least 2 pictures of the technology they researched
- In 6-8 lines, students must describe:
 - The technology that helps to produce more food
 - How this technology produces more food
 - How it contributes to food security
- Students must write their **NAME** and **CLASS** at the back of the project
- Please ensure that the work is neatly done and is brought in **NO LATER THAN**

Please note that marks will be deducted for each late day of submission.

Please see the rubric below for the marking criteria:

Pictures	4 marks
Description of new technology	2 marks
Description of how the technology produces more food	2 marks
Description of how the technology contributes to food security	2 marks
Neatness	1 mark
Following instructions	1 mark
Total	12 marks

A soft copy of this letter is available on our websites

Kind Regards,

Grade 4 Agricultural Science Teachers
